

Read completely the guidelines before answering the exam.

Guidelines and General Information

- Duration : 45 minutes.
- Required equipment : a black pen.
- Advised equipment : pencil, tipex, eraser
- All electronic devices are forbidden.
- All documents are forbidden.
- The care of your submission will be taken into account.
- The grading scale is indicative.

Guidelines related to the Multiple-Choice Questions

- **The answers to the questions should be noted exclusively on the dedicated answer sheet : the answers given on the subject sheets will be ignored.**
- **You should submit only the answer sheet.**
- Final answers should be given with a black pen. Do not use a felt-tip pen.
- Otherwise stated, answering a question amounts to mark all the boxes corresponding to the assertions you believe are correct or to indicate the answer to the question in (exclusively) in the dedicated field.
- To mark a box, it is required to **fully color** the box. Do not tick nor put a cross in the box. See Figure 1. Color with a **black** pen. Advice : start by marking your answers with a pencil and then finish with a pen before the end of the exam. If you want to cancel a choice, put some Tipex on the box (no need to redraw the box).
- Marking a box corresponding to a correct statement gives points, marking a box corresponding to an incorrect statement removes points, not marking a box has no influence on points.
- The questions with a ♣ symbol may have one or more correct statements. The others have a unique correct answer.
- For the questions with a unique correct answer, marking several boxes cancels the answer.
- The questions are independent. It is yet advised to read all questions before starting to answer. **Caution, some questions can be cut on two pages.**

(-i-) KO

(-ii-) KO

(-iii-) KO

(-iv-) OK
